DETAILED ACTION

Election/Restriction

Applicant's election without traverse of Group I, i.e., claims 1-11, in the reply filed on May 18, 2005 is acknowledged. *Accordingly*, claims 12-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Objections

Claim 11 is objected to because it appears that --of-- should be inserted after "edge" in line 2. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3, 4, 7, and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said slatwall member" in lines 6-7. There is insufficient antecedent basis for this limitation in the claim. Accordingly, there is no antecedent basis for the recitation "said slatwall member" in claims 3, 4, and 8.

Claim is rendered indefinite since the claim is contradictory to claim 1. In particular, claim 1 sets forth that the top panel is secured to the upper edge and then claim 7 recites that the upper edge extends above the top surface of the top panel.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,025,931 (Berger '931).

Berger '931 discloses a curved display shelf comprising an arcuate sidewall (13) having an upper edge (at 13 in Figure 3) and the sidewall having a plurality of horizontally parallel grooves (in between 18 - see Figure 4) and thereby defining a slatwall member; a top panel (26 - see top of Figure 1) secured to the upper edge whereby the upper edge extends above a top surface of the panel (26); at least one hook (24) operatively secured to the shelf and *with respect to claim 9*, is configured to be hung from a slatwall (i.e., 18) and *with respect to claim 10*, the hook (24 - see Figure 3) is attached to the top panel (26); the sidewall is bent to a semi-circular shape; the shelf is made from a light polymer from injection molding (see column 2, line 57), i.e., an extruded plastic.

Claims 1, 6, 8, 9, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,718,561 (Eckert '561).

Art Unit: 3634

Eckert '561 discloses a shelf made from molded plastic comprising an arcuate sidewall (at 18) having an upper edge (at 24 - see top of Figure 1) and the sidewall (18) having at least one groove (in 18 in between 28 and 18); a top panel (20) secured to the upper edge of the sidewall (18) whereby the upper edge has a recess (see top of Figure 1) and the panel 920) has a peripheral edge disposed in the recess; at least one hook (40) operatively secured to the sidewall (18); and a member 9another element 18) secured along a back edge of the panel (20).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Berger '931, alone.

Berger '931 discloses the shelf as advanced above.

The claim differs from Berger '931 in requiring the grooves to be T-shaped.

Although Berger '931 does not show the grooves as T-shaped, it would have been an obvious design choice to one of ordinary skill in the art at the time the invention was made to have fabricated the grooves as having a T-shape, for increased securement of items hung therein and for ease in economy and manufacture.
